

*Note: Both employees and supervisors must complete and submit their annual assessments in CAS2Net by **30 September 2026**. No system extensions are permitted.*

Part I: Employee Self-Assessment Quick-Check

Use this section to quickly audit an employee's self-assessment before final submission in CAS2Net.

1. Format & Core Structure

- ☐ **W-R-I Format Compliance:** Are all Factor entries written strictly in the *What-Result-Impact* format? *(See Guidance Part I, Section 1)*
- ☐ **Objective Alignment (Coming in 2027):** Are plan objectives (e.g., JA1, CT2) annotated immediately following the "What" statement? *(See Guidance Part I, Section 1)*
- ☐ **No Content Duplication:** Have you verified that no entries are copy-pasted from prior cycles or repeated across factors? *(See Guidance Part I, Section 1)*

2. Quantity Standards

- ☐ **Minimum Entry Count:** Does the assessment contain at least nine (9) total W-R-I entries (minimum of three distinct W-R-I statements for JA, CT, and MS)? *(See Guidance Part I, Section 2)*

3. Coded Positions & Special Objectives (If Applicable)

- ☐ **Supervisory Objective:** Is the management narrative written in paragraph format (no W-R-I) at the *beginning* of the JA factor? Does it use the mandatory staffing count format? *(See Guidance Part I, Section 3)*
 - ☐ **Acquisition Coded Positions:** Is the self-certification statement placed at the beginning of the MS factor? *(See Guidance Part I, Section 3)*
 - ☐ **DoD FM Certification Coded Positions:** Is the FM self-certification placed at the beginning of the MS factor (as the 1st or 2nd statement)? *(See Guidance Part I, Section 3)*
 - ☐ **W-R-I Exclusions:** Have you verified that none of these mandatory paragraphs are counted toward the minimum of three W-R-I statements for that factor? *(See Guidance Part I, Section 3)*
-

Part II: Supervisor Narrative Quick-Check

Use this section to audit a supervisor's assessment narrative and scoring recommendations for compliance and defensibility.

1. Narrative Entry Structure

- ☐ **Mandatory Lead-In Phrase:** Does the written narrative for *every* factor begin with one of the four exact, mandatory phrases? (*See Guidance Part II, Section 1*)
 - "Meeting expected contributions."
 - "Exceeding expected contributions."
 - "Partially meeting expected contributions."
 - "Not meeting expected contributions."
- ☐ **Prerequisite Verification:** If "Partially" or "Not meeting" is used, are documented feedback, MFRs, or a CIP already active in the record? (*See Guidance Part II, Section 1*)

2. Content & System Calibration

- ☐ **Objective Alignment (Coming in 2027):** Are objective tiebacks (e.g., (JA3, MS2)) annotated at the very end of the narrative block? (*See Guidance Part II, Section 2*)
- ☐ **Mandatory Objectives Concurrence:** Does the supervisor explicitly state concurrence or non-concurrence with the employee's self-certifications? (*See Guidance Part II, Section 2*)
- ☐ **Strict Objective Focus:** Is the narrative entirely free of personal characteristic or personality comments? (*See Guidance Part II, Section 2*)

3. DAF PAQL Statement Formatting

- ☐ **Mandatory Prefix:** Does the performance quality assessment segment for each factor begin with "PAQL : "? (*See Guidance Part II, Section 3*)
- ☐ **Bold Text Application:** Is the entire PAQL statement formatted in **bold text** within the CAS2Net narrative field? (*See Guidance Part II, Section 3*)

4. CAS2Net System Checks

- ☐ **Tri-Metric Complete:** Are all three required scores (Categorical, Numerical, and PAQL) recommended and entered for each factor? *(See Guidance Part II, Section 4)*
 - ☐ **EOCS Math Check:** Is the difference between the recommended OCS and the employee's EOCS mathematically correct and justified? *(See Guidance Part II, Section 4)*
 - ☐ **VoP Calibration:** If the OCS exceeds the Value of Position (VoP), has it been correctly verified for CRI eligibility vs. CA/Bonus payout? *(See Guidance Part II, Section 4)*
 - ☐ **Midpoint Verification:** Has the midpoint discussion date and communication method been officially documented? *(See Guidance Part II, Section 4)*
-

Appendix: PAQL Statement Examples

Supervisors must use the "PAQL : " prefix and write these statements in **bold text** in CAS2Net. Use these verified syntax examples for your factor entries:

Example 1: Level 5 (Outstanding)

PAQL: Joe's quality of performance exhibited in achieving his contribution results substantially and consistently surpasses the factor-specific expected contribution criteria and his contribution plan goals and objectives. He delivered exceptional, flawless results ahead of expected timelines, directly optimizing resource utilization and enhancing team capabilities.

Example 2: Level 3 (Fully Successful)

PAQL: Johnny's performance consistently achieves, and sometimes exceeds, the factor-specific expected contribution criteria and his contribution plan goals and objectives. His work products generally required minimal revisions, demonstrating consistent attention to detail and reliable completion of all assigned milestones on time.

Example 3: Level 1 (Unacceptable)

PAQL: James' performance fails to meet the expected contribution criteria and the required results for the goals and objectives set forth in his contribution

plan for the appraisal. His work products required continuous and extensive revisions, which negatively impacted the team's ability to support critical program deadlines.
